

- What do I want to learn or understand better?

This sprint I have worked with building a menu for our game. I have learnt how to position objects in unity using different layouts. I am happy with the functionality of it, but I also want to understand how to make it look good. Therefore, I am going to look up some tutorials on that subject.

- How can I help someone else, or the entire team, to learn something new?

We have scheduled meetings twice per sprint so there are good opportunities to ask each other questions if needed. I can help maybe by sharing recently acquired knowledge during these meetings.

- What is my contribution towards the team's use of Scrum?

The team is beginning to really adapt the scrum workflow. Right now, it feels like we are getting better at planning our sprints and dividing bigger tasks into smaller ones. My contribution to this has been an active and inquisitive presence in the discussions. I would like us to keep getting better at defining what needs to be done and how it is to be done. So, I will take that with me to the discussions.

- What is my contribution towards the team's deliveries?

As I touched upon earlier, I have completed tasks regarding our menu. I am happy with how that turned out. It feels good to be productive so I will continue contributing to the best of my ability.
