What do I want to learn or understand better?

I want to learn how to efficiently plan game-programming projects, and how to balance time between planning and implementing.

How can I help someone else, or the entire team, to learn something new?

I can offer suggestions for planning our project structure based on previous programming experience, and how we can properly utilize an object-oriented approach.

What is my contribution towards the team's use of Scrum?

Helped further explain the sprint-cycle process and showed how to use features to help us with this specifically in JIRA, as well as setting up JIRA for our team.

What is my contribution towards the team's deliveries?

I have set up a JIRA board for our team, as a platform for us to track our progress and manage our sprints.
