# Individual Reflections

## Martin Andersson 2020-09-27

- **What do I want to learn or understand better?**

  To next week I want to learn more about how to get started with setting up the game and how to try set up basic gameplay. Focus will be on trying to weave the earlier sprints together and it will be fun to learn about the challenges that comes with it.

- **How can I help someone else, or the entire team, to learn something new?**

  I worked with the resource manager this week and can probably help when we are going to convert the resource values to visual representations.

- **What is my contribution towards the team's use of Scrum?**

  I made some of the user stories and subtask and tried to rephrase some of our existing ones if there were any uncertainties around the purpose or the meaning of the written tasks.

- **What is my contribution towards the team's deliveries?**

  Worked with Adam on the resource manager and implemented functions that will be useful to have when we later connect the backend values with the frontend visuals.
