- What do I want to learn or understand better?

> I have worked a lot in group projects before but I always think there are more to learn when it comes to effective collaboration and communication. Therefore my initial learning objective will be to better understand how to set up an effective working model for myself and the team. To do this I will research and communicate.

- How can I help someone else, or the entire team, to learn something new?

> Right now I don't really know if anybody in my team need my help and if so, with what. I need to know that in order to be of any help. To know this I will ask in our scheduled meetings if anybody needs help with anything.

- What is my contribution towards the team's use of Scrum?

> I do not know alot about scrum yet. I need to know more about scrum to pass this course. Therefore I should read about it and maybe open a dialog about how to use it with my team.

- What is my contribution towards the team's deliveries?

> We have deliverd the files for week one and I contributed with suggestions and input about what should be included or not, I am very happy with how it turned out. I should be even happier about the deliveries. So therefore I am going to try and contribute at least as much next week as I did this week.
